# REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 22,

THE REDCLIFF REVIEW

THURSDAY, MAY 14th, 1933

Number 28

## The School Concert Pleases Big Audience

Was Held in Gordon Memorial Last Friday

Gordon Memorial School room was filled to capacity last Friday evening for the entertainment put on by the pupils who are to represent Redcliff school at the Music and Dramatic Festival to be held in Medicine Hat tomorrow evening.

Although the program was a lengthy one, it was carried through with such dispatch and each number was so well done that the audience was sorry when it was concluded.

Every grade in the public school from the tiny tots in grade one to the bigger ones in grade eight, was represented on the program, which was made up of solos, choruses, recitations and junior and senior dramatics.

The manner in which each item was rendered showed careful training on the part of the school staff and so much appreciated and enjoyed was each, it would be hard to single out any one number for special mention. However one could hardly refrain from complimenting the pupils of grade seven for the very excellent manner in which the several characters portrayed their parts in the dramatization of Ben Hur. If they do it as well at the finals tomorrow evening the other schools will have to go some to beat them.

The play was composed and arranged by Mr. King especially for the occasion and the costumes were designed by Miss Broadfoot. Both showed splendid talent and taste.

An additional feature of the program was the High School oratorical competition in which four students took part. These were Margaret Rutherford, whose subject was "The unemployment problem" Albin Podesta on "The Failure of Success," Jim Brown on "What Price War" and Ruth Pow on "The Way to Lasting Peace."

Such marked ability was displayed by all four speakers that the judges experienced great difficulty in arriving at a unanimous decision. However the markings were figured on the transferable system and when counted up it was found that Jim Brown had won out by a narrow margin.

Tony Dominick, who has been a resident of Redcliff since 1919, died suddenly at the home of Wm. Kondorf here, last Monday morning. Deceased was a Lithuanian and came here about a year ago when he retired. He was 67 years of age. His wife and one son have been living in Brazil for a number of years past. The funeral took place from St. Marys church here this morning.

Commencing May 1 all tax exemptions on cheques were removed. In future all cheques no matter what the amount, will have to have an excise stamp on. Postal notes will also have to bear this tax.

## I.O.O.F. and Rebekahs Hold Pleasant Evening

Novelties and Popularity Contest Prove Interesting

One of the most entertaining and novel evenings held in Redcliff for some time was greatly enjoyed by those who attended the social and dance on Monday evening under the auspices of the local I.O.O.F. and Rebekah lodges.

What was indulged in for the first couple of hours, the honours going to Mrs. Ross McKay and Mrs. Tanner.

During the dance which followed several novelties were introduced. The prize for the spot waltz, was won by Mrs. H. Van Wert and Mr. Cliff Bergeron. Mrs. W. Fitzhenry and Miss Blanch Fitzhenry won the prize for the Polka, while the laurels for the old fashioned waltz were carried off by Mr. and Mrs. Geo. McKay, who won the bass of a coin, when they tied for the prize with Mrs. B. Hurlbert and Mr. T. Davies.

The greatest interest of the evening no doubt centered about the popularity contest when Miss Ivy Podesta and Miss Sarah Davis were tied for first place. The winner was decided by a gentleman with eyes closed marking a cross on a paper containing the names of the two contestants. This mark was found to be nearest Miss Sarah Davis name, so she was declared the winner.

The music for the evening was provided by Mr. J. Horne, saxophonist, Mr. J. Schille, violinist, and Mr. G. Thomson pianist. It is therefore unnecessary to add that the music was all that could be desired to put everyone in the humor for dancing.

Altogether the evening was a splendid success and reflected great credit upon the entertainment committees of the two lodges.

## BENNETT PLEDGES CANADA'S SUPPORT

Premier Bennett, made a statement in the House of Commons Tuesday regarding his conversations with President Roosevelt at Washington. He read a joint statement given the press on Saturday in Washington, stressing the satisfactory nature of the conversation. Premier Bennett concluded: "I promise Canada will play its part in the task of seeking world recovery through co-operation with the United States and other nations of the world."

## STOCK MEN TO MEET IN MEDICINE HAT

Word has been received by Chamber of Commerce that the annual meeting of the Western Stock Growers' Association to be held there, will convene on Friday, May 26. The Chamber of Commerce is considering ways and means of arranging entertainment.

Miles Gibbans is seriously ill in the hospital where he underwent an operation yesterday.

## Wants Readjustment Of World's Standards

To Serve Effectively Human Interests and Needs

In a public address delivered as his economic conversations with President Roosevelt drew to a close, Prime Minister R.B. Bennett stressed the urgency of restoring confidence in international trade. Such restoration he held the prime incentive towards an eventual return to better times and international contentment.

Mr. Bennett is reported to have made a stirring plea for readjustment of the world's economic and monetary standards to serve effectively human interests and human needs.

## Fishing Season Opens Tuesday May 16th

Fishermen Warned to Study the Laws and Regulations

Alberta's fishing enthusiasts are preparing for the opening of the season on May 16th, when trout fishing will open in the North Saskatchewan and Red Deer rivers and their tributaries and in Cold Lake, and when fishing of perch, pickerel, pike and gold-eyes will also open, being confined to waters where no trout, grayling or Rocky Mountain whitefish are found.

Fishing for trout and grayling in the Athabasca and its tributaries and in the Bow River and its tributaries south to the international border, does not open till June 15th. Residents of the province require angling permits only for those waters frequented by trout, grayling or Rocky Mountain whitefish. The fisheries division warns fishermen to become conversant with the regulations in every respect.

## GOVT. GUARANTEES THE WHEAT MARKETING

The authority under which the Dominion government guaranteed advances made by the banks in respect to the marketing of grain produced in the three prairie provinces has been extended to cover the fiscal year ended March 31, 1934. The extension is under exactly the same conditions as the previous order.

## NEW HOMESTEAD AREA NOW OPEN IN ALBERTA

About 200 township of land in Alberta, ranging from the Calgary district in the south to the Fort Vermilion district in the north, which has previously been closed to settlement, were opened for homestead entry on May 2nd. Over 2,000,000 acres of land will be available.

## JUST FOR FUN

There was a young lady from Clyde,  
Who ate some green apples  
then died,  
The apples fermented  
inside the lamented  
And made cider inside her  
inside.

## School Festival in Medicine Hat All Day Tomorrow

Big Concert Given By Winners In The Evening

The program for the music and dramatic school festival will open at nine o'clock Friday morning. The vocal and choral contests will be held in the Empress Theatre; recitations and dramatic work in the City Hall, and recitations only in Toronto Street School. The full day will be required to complete the adjudications and a great concert will be given by the finalists in the Empress Theatre in the evening.

The entire day's program is open to the public so that everyone interested in children and their musical and dramatic progress will have the opportunity of hearing them.

After each class has completed the adjudicator will give his criticisms which will be most constructive and helpful, not only to the contestants but the audience as well. Both morning and afternoon sessions will be beneficial to those who attend and your presence will do much to encourage the young contestants to their best. A silver collection will admit you.

## Mystery Wax Museum At New Dreamland

The unusual setting of a complete wax museum filled with images of famous characters of history and notorious criminals, forms the motivating background for the Warner Bros. mystery thriller, "The Mystery of the Wax Museum" which opens at the New Dreamland theatre on Thursday.

The museum is an irregular triangle in shape 120 feet long, 80 feet wide and 25 feet high. It is filled with 104 wax figures of Marie Antoinette, at the guillotine, the assassination of Marat by Charlotte Corday, Joan of Ark, Voltaire, Cromwell, Richard III and many others.

The figures are all made to order by L. E. Otis and his assistant, H. Clay Campbell, of Los Angeles Wax Figure plant. The figures were in part made from casts of players in the picture, chosen to resemble the wax figure they represented. Others were made from photographs of biets of marble or bronze. Six weeks were consumed in building the museum and making the figures, which also had to be authentically costumed.

Weird light effects thrown over the museum are said to greatly increase the creepiness of the scenes which take place in the museum. The effect is heightened by the technicolor photography, which is used throughout.

Luis M. Sanchez Cerro, president of Peru since December 1931, was assassinated last Sunday on his way home after reviewing a parade of 20,000 young men. Cerro died almost immediately. His assassin was shot on the spot by the guard.

## Vega Rebekah Lodge Holds Successful Sale

Was Well Attended and Results Were Gratifying

The Spring Sale held under the auspices of Vega Rebekah Lodge was a splendid success.

The booth section, a tasteful arrangement of lattice work covered with fancy and artificial sweet peas, designed and executed by Mrs. Mallard, made a very artistic setting for the display of the dainty articles for sale.

There was a good turnout of buyers and most of the stock found ready sale.

After-noon tea was served at several daintily arranged tables during the afternoon.

As a result of their many months of preparation the ladies of the lodge realized a fine sum.

Franklin D. Roosevelt is rapidly acquiring more complete control over the affairs of the United States, both domestic and foreign, than has ever been in the hands of a president.

When Mr. Roosevelt says, "close the banks," the banks take a holiday and when he says open them they again do business as usual. Roosevelt says: "let there be beer" and there is beer. He demands the passing of a bill to assist farmers and the bill is passed.

His demand for the control of currency gives him the power to expand or contract not only credit but actual paper.

He invites leaders from other countries to converse with him on international and world conditions and they accept his invitation with pleasure.

In a word President Roosevelt is the man of the hour not only in United States but in world affairs, and so far he appears to be getting along very nicely.

Mrs. Sid Harper is progressing favorably after an operation for appendicitis in the hospital on Tuesday.

## Churches

**ST. MARY'S CHURCH**  
Celebration of Mass every Sunday of each month except first Sunday, at 8:30 a.m.

## GORDON MEMORIAL UNITED CHURCH

Pastor: Rev. R. Enskine Pow  
10 a. m. Church School.  
11:15 a. m. Morning Worship  
3 p. m. Bowl,  
7:30 p. m. Evening Worship.  
The hope of immortality is the best of all hopes."

**ST. AMBROSE CHURCH**  
Rev. Malcolm Steuart, Vicar  
9 a. m. Holy Communion.  
10 a. m. Sunday School.  
1st and 3rd Sundays  
11 a. m. Choral Eucharist.  
2nd, 4th and 5th Sundays  
11 a. m. Matins and Sermon.  
7:30 p. m. Evensong and sermon.

## Farce Comedy Coming To New Dreamland

With Buster Keaton Jimmy Dorr and Polly Moran

It is guaranteed sure cure for depression blues. "Passionate Plumber" brings a group of funsters to the New Dreamland starting Monday, May 8th. It is said to be the spiciest and most amusing comedy yet turned out by the Metro-Goldwyn-Mayer Studios. Buster Keaton has the title role and further hilarity is guaranteed by the presence of Polly Moran who acts, as Jimmy Durante's consort. Irene Purcell plays opposite Keaton and the cast also includes Gilbert Roland, Mona Marie, and others.

Also added to the funfest is Phil Harris, honey-toned sensation of the radio, in "So This is Harris." Harris is the most popular orchestra leader and crooners on the Pacific coast, aided by Walter Catlett, J. J. Brewster, Helen Collins, brings a crescendo of tinkling tunes crackling with smart repartee.

Full of convulsive situations, bristling with ammy ideas, zips and splices and graces in every line of word and action, the zenith of eye and ear entertainment.

A howling comedy of soft music and loud laughs.

## Redcliff Reminiscences

Taken From Our File of May 1 - 1914

The Redcliff Clay Products Co. under the management of Mr. Bryant opened up for business with a staff of thirty men. An order for half a million of the famous pressed brick has been received from Swift Current.

At the regular meeting of council this week plan for the new sewerage system were ordered. The trunk line will be laid before fall. The cost of the system will not exceed \$250,000 Mayor Bott stated. It was also decided that an addition to the town hall be built to cost \$15,000. A bylaw to borrow \$50,000 at 7% for current expenses was given its third reading and carried.

Mr. W. T. Lockwood is building a fine new block on Broadway near the corner of 3rd St.

Over 200 children have been vaccinated in our public school during the past week.

## BIRTHS

Tomks - In Redcliff on Friday April 24, 1914 to Mr. and M. A. Tomks, a son.

McLeary - In Redcliff on Friday April 24, 1914, to Mr. and Mrs. McLeary a son.

## THE NEW SHOE FACTORY

The new Shoe Factory has started operations with 60 men employed. The staff when complete will consist of 100, but it is very difficult to secure men for the positions available.

Mr. G. L. Oliver of Calgary has been employed by the Hicks Store here.

## Research Director Presents Many Striking Statistics To Indicate Upward Swing Of Wheat Prices

If history is to repeat itself, the all-time "low" in the price of wheat and probably of the general commodity price level has been reached.

This was the contention of Major H. G. L. Strange, director of the research department of the Saskatchewan Grain Co., Ltd., Winnipeg, who recently addressed a meeting of the general membership of the Regina Board of Trade.

Major Strange presented many striking statistics to indicate wheat should climb to 67 cents at country elevator as the surplus disappears.

Major Strange traced the contention of the all-time price level having been reached "on the fact that what is occurring today occurred following wars of other years," and also of the report that the index number of wholesale prices rose from 63.6 in February to 64.4 in March, according to a statement issued by the Dominion Bureau of Statistics.

Displaying a chart, collected 500 years of wheat prices, showing by George Broomhall, English wheat statistician of Liverpool, England, the speaker said it could be noticed the price of wheat was over fluctuating as it marched through time, but at three periods from 1400 to the present, the price fluctuated violently, both up and down, in periods corresponding to the three great world-wide wars—the 30 years' war in Germany, the Napoleonic wars and the recent World War—each of them over 100 years apart.

The length of time these fluctuations have taken to rise and fall have been substantially the same during each of the three periods. The high price of wheat in the 30 years' war in Germany to the bottom of the decline was 11 years, in the Napoleonic wars it was 10 and in the recent years, and in the autumn of 1931, the eleventh year after the high price of wheat in the Great War, the decline was arrested in Britain, according to Liverpool, the speaker said.

The price of wheat will rise at the country elevator two or three cents as the pound and dollar come closer together, Major Strange continued, adding that 10 cents should be the general commodity price level, rise back up to the pre-war level. It would also rise to the extent of the additional 26 cents a bushel, although the price at the country elevator of 67 cents, should the surplus entirely disappear, the speaker said.

"I do not hesitate to say," Major Strange commented, "that all the economic forces that impel themselves upon wheat are tending to push back the price to the 1913-14 level, but perhaps not higher."

Some of the "economic forces" within the trade have felt obliged to oppose, the speaker said, were such as the wheat board, an excise tax on wheat for making it out of Canada, reduction of wheat acreage in Canada and other proposals to replace the present methods of handling and marketing grain in the Dominion.

"The futures system of marketing has been, and is being, violently attacked by those who favor a wheat board," the speaker continued, adding, "they carefully remind, however, from explaining what a wheat board would do that the present system is not already doing. They speak vaguely of differentiating between returning the world's price of wheat and returning the world's value of wheat. A distinction absolutely impossible to define, because they are one and the same thing as far as money is concerned."

Some stated the future system of marketing had no room in discussing new markets and that perhaps a wheat board or some other organization could do this, Major Strange continued.

"The fact is today that there are literally hundreds at work exploring every possible wheat market in the world to dispose of Canadian grain," the speaker said, "all experienced men who are continually extending the virtues of Canadian grain and endeavoring to promote its sale."

"Much has been said about untapped markets for wheat in China. This again is a fallacy," the speaker maintained. "The true facts are that China produces on the average twice as much wheat per year as does Canada, and in addition, four times the volume of rice that we do wheat in Canada, and that 450,000,000 people in China consume more cereals in the form of rice and wheat per head than do the people of Canada."

W. N. O. 1900.

BARRIED SHAFTS OF WIT LOST G. R. S. ADMIRERS

The rapid-like wit for which he is famous was the cause of losing George Bernard Shaw, the celebrated author and dramatist, two of his most ardent admirers during his recent visit to Hollywood. He went to San Pedro, where he stopped off at the movie-capital to see at first hand how the great industry is operated. During a tour of the sets he was introduced to a number of famous film stars, and it was at these introductions that G.B.S. gave his well-known wit the workout that lost him two notable fans. First, the visitor bluntly inquired of Alice Brady "why a girl with a nice face like yours wears a hat like that." That placed Miss Brady among the anti-Shawians, for while she was not averse to criticism of her clothes—her hat in particular—is not one of them. She looked her next barb when lovely Ann Harding was introduced. Miss Harding remarked that she was soon to play in one of Shaw's plays—"Captain Brassbound's Conversion." Whereupon Shaw inquired where she had played the part previously. Miss Harding said "a little town near Philadelphia," and was admonished when the dramatist announced: "I'm sure it must be a practical performance"—and as a practical performance in the production of a play without payment to, or permission of the author, Miss Harding retired to her room in tears.

### World's Seaplane Record

Italian Aviator Makes An Average Of Over 426 Miles Per Hour

"Red Bull," powerful little speed plane piloted recently by Red Bull, the world's seaplane speed record holder, with Francesco Agello at the controls. For five laps over Lake Garda, Italy, Agello made an average of 426.5 miles an hour.

Previous record, set by Lieutenant George E. Stanford, of England, in 1931, was 408.5.

Agello reached a maximum speed of 426.5 on his fourth lap, and his minimum was 421.48 in the third lap. Air officers said a new engine would be installed on an attempt to reach a speed of 700 kilometres or 435 miles.

Agello was a member of the Italian Schneider cup team in 1929. His successful attempt climaxed a series of such efforts at the high speed airport here in which several craft were lost.

### Will Review Income

A review of total incomes received by pensioners in the Dominion service will be made, and if any are considered excessive, the salary, but not the pension will be reduced. This it is intimated, was the position of government as outlined by Mayor W. J. Stewart, of Toronto.

Just when farm boys are adept in adjusting car mechanics, the old horse stages a comeback and they've got to learn to tack a halter.

"No, I don't 'old' with 'em, Ma'am. More than one friend of mine 'as 'ad the bread 'as' butter took out of their mouths by them things."—The Humorist, London.

## A New Process For Sprouting Grain To Turn It Quickly Into Fresh Fodder For Cattle

### Watching For Contraband Shipments of Munitions

Cloze Check Ordered On Ships From B.C. To Orient

Customs officials at British Columbia seaports have been ordered to make a close check for contraband shipments to the Orient during the next few weeks. Hostilities in Jehol and the prospect of prolonged fighting have increased the demand for war materials, and it is suspected that munitions have been sent across the Pacific in the guise of ordinary merchandise.

There is a good deal of smuggling going on, according to investigators. Five hundred rounds of ammunition were recently discovered on the liner "Empress of Japan." This was shipped in boxes labelled with a bogus description and would have passed through the customs official's special vigilance.

Of course, there is no embargo on munitions leaving the country, provided they have been purchased in a legitimate way and all other legal procedure has been observed. For instance, the Japanese government recently completed purchase of a large quantity of steel track which was being lying idle at Fort Mann, since construction of the Canadian Northern Railway was suspended many years ago. This material will probably be used in the manufacture of munitions, but is considered a strictly business-like deal.

Consolidated Mining & Smelting Company at Trail is making regular shipments of zinc to the Orient and there is little doubt that most of it is used in the making of shells.

### A Chinese Landlord

Cancelled Payment Of Back Rent Owed By Unemployed Man

Somewhere in the city of Halifax there is a Chinese landlord with more "heart" than some of the English members of the rent-collecting fraternity.

In the northwest end of the city there is a family, the head of which has been out of work for a considerable period of time, with the result that they are now long on account and short of cash.

They live in a flat rented to them by the Oriental landlady, who, along with other creditors, has been waiting for his money for several months. He called several times for the money and noted that each time the condition of the family seemed to be getting worse.

He called again recently and handed the landlord an envelope. The father of the family took it with a sinking heart, expecting, on opening it, to find a notice of eviction, which would throw him and his loved ones out on the street.

After the departure of his Chinese wife, he was plucked up courage enough to open the mislaid to discover to his joy that it contained, not an eviction notice, but a receipt bill for the total of his back rent, amounting to more than \$100, wiping off the debt in its entirety.

Needless to say, any feelings of animosity that this particular family might have entertained toward the yellow race was eradicated by this act of uncalculated kindness.

### Checked Up On Doctor

Boy In Montreal Hospital Proved Fallacy Of Old Speech

Royal Victoria Hospital in Montreal, claims to have found the origin of the "child who notices things."

His name is George Ross, aged ten. George arrived at the hospital to undergo a slight operation. Before the anesthetic was administered, the doctor in charge made his usual little talk to the patient, assuring him that there would be no pain and that the whole affair would be matter of a minute.

George's first remark on coming out of the ether was directed in a respectful tone to the doctor: "It was seven and a half minutes," he declared. A clock near the bed which George had studied last thing in and first thing out enabled him to check the doctor's veracity.

People of Vienna, Austria, are eating less food per person than a year ago.

Based, an anti-bark for gasoline, is present in the waste gas of Turner Valley.

A new process for sprouting grain, within a few days so as to turn it into fresh fodder for cattle has been brought to the attention of German farm experts by Dr. Spangenberg, who believes that it will revolutionize cattle breeding by permitting industrial manufacturing of fodder.

The new process proposed by Dr. Spangenberg and recently tested by the German Agricultural Society is briefly as follows: The grain that is to be sprouted is spread upon large perforated iron sheets or ridges in a layer of about one inch. The ridges in turn are placed into open wooden cases of the same size, so that they are resting in the middle of the cases. Pouring a liquid over the grain at regular intervals a rich growth of light green sprouts is produced which may be harvested after ten to twelve days, when they have grown to a height of about ten inches.

Dr. Spangenberg did not reveal the nature of the liquid used in his experiments and to which he attributes an especially quick growth of the sprouts and their—according to him—absolutely high nutritive value. The liquid is composed of phosphoric acid, potassium nitrate, potash and lime.

Similar mixtures have already been used for some time in experiments of this kind by the society. When testing the liquid supplied by Dr. Spangenberg, the experts of the society applied at the same time their usual high nutritive value instead of other ridges, filled with grain. It was found that, as to the rapidity of growth, there was not much difference in the three cases.

The great advantage of this process is that it enables the farmer to introduce some readily available liquid to the cattle, especially in winter, when no fresh fodder is available. It, moreover, seems to have a beneficial effect on the milk production. Dr. Spangenberg maintains that tests in Lubeck have shown recently an increase of the milk production by 10 to 15 per cent, after feeding sprouts instead of grain only. Experts of the agricultural society, however, expressed some doubt as to the feasibility of fattening cattle, hogs and other animals by feeding them these sprouts.

The reason why it would be more expensive to fatten cattle by feeding them sprouts than by feeding them grain, is that the liquid used in the process of the cost of the liquid used to sprout grain, the process of sprouting leads to a loss of nutritive value. The reason why it would be more expensive to fatten cattle by feeding them sprouts than by feeding them grain, is that the liquid used in the process of the cost of the liquid used to sprout grain, the process of sprouting leads to a loss of nutritive value.

The sprouts are therefore of real value chiefly to chicken farms and dairies where a permanent supply of fresh, green fodder is desirable and where the high value of the product warrants the additional expense. It is pointed out by farm experts. The sprouts, if harvested at the right time, represent an excellent fodder. According to Dr. Spangenberg, the cost of 250 pounds of sprouts produced from about 800 pounds of grain is little more than 20 cents.

### Last Lord-Marcher Dead

Was Only Holder Of That Title In United Kingdom

Sir Martine Lloyd, head of the oldest Welsh family of direct descent from the royal houses of both England and Wales, died April 4, aged 81. He was the only Lord-Marcher in the United Kingdom. Having destroyed the titles of every other Lord-Marcher. He exercised his rights right up until the present time, he has appeared annually, under his hand and seal, the Mayor of Newport, Pems., in the Barony of Newports, Owing more than 100,000 acres in four different counties. Sir Martine was perhaps the most popular landowner in Wales.

Bees have a special liking for blue-colored flowers.

By Ruth Rogers

GRACEFUL FOR THE MATION

Decidedly chic and alluring. Delightfully becoming to the larger figure is a dress of the type presented for today's pattern.

The skirt panelled at the back with a blue velvet effect and vertical seam running down the center-front, are most alluring.

And how distinctive and smart you'll feel in this attractive navy blue crinkly crepe silk dress. For it fits, plain white crepe combined with a navy and white crepe print.

Style No. 523 is designed for sizes 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 3 1/2 yards 38-inch, with 1/2 yard extra contrasting.

Its small cost will amaze you. Price of pattern 25 cents in stamps or coin (but in pattern). Wrap coin carefully.

Importing Nature

The chemical process used by nature to make coal from peat has been speeded up. What nature takes millions of years to do is done by scientists in three months. A scientist in Cincinnati, O., has isolated the coal germ and with this bacteria can inoculate a peat bed so that it will turn into coal in a short time.

## SIGNS OF SPRING

"In the Spring a fuller crimson  
Comes upon the robin's breast;  
In the Spring the wanton lap-  
wing

Gets himself another crest;  
In the Spring a livelier iris  
Changes on the burnished  
dove;

In the Spring a young man's  
fancy  
Lightly turns to thoughts of  
love."

Spring has come. Even in  
Redcliff there is unmistakable  
evidence of the fact. After the  
dull weather of the past months  
"Here comes the Sun!" And  
what is more glorious than the  
Spring sunshine in Alberta?

How it floods the landscape and  
puts new vigor into every living  
thing! The prairie is smiling  
under its warm caress and the  
drabness is giving way to the  
softest green imaginable.

The wind has lost its chill.  
It fans the cheek with a new  
touch. The tumble weeds no  
longer go hurtling across the  
fields. They have found harbor in some  
secluded corner, or have been  
burned with the other winter  
rubbish.

The pedestrian has a lighter  
step. The brick sidewalks do  
not seem so lumpy as they did.  
And the bumps on Broadway,  
to the motorist, surely are not  
so lumpy.

Folks greet each other with  
a new warmth and friendliness.  
They feel more kindly towards  
each other.

The paint brush and the rake  
are very much in evidence and  
the "sound of the hammer is  
heard in the land." Children's  
feet lag on the way to school.  
Nature is calling them. No one  
but a child knows how hard it  
is not to answer that call.

The sparrow is no longer our  
only feathered friend; the robin  
and blue bird are here, and the  
boys have their bird houses set  
and ready for their new occu-  
pants.

And although we do not have  
the lapwing and the dove, that  
Tennyson sings of in "Locksley  
Hall"; still in common with all  
other localities we have this  
young man with his thoughts  
of love. He is one evidence of  
spring that never fails.

Yes, Spring is here.

A DIFFERENT ANGLE

The Lethbridge Herald and the  
Medicine Hat News, both  
Liberal papers, find fault  
with the present government  
at Ottawa because it has changed  
its mind on one or two occa-  
sions before coming to a definite  
conclusion regarding its budget.

These papers, apparently, think  
this is a sign of weakness.

The Review looks at it from a  
different angle.

In the first place we think  
it a healthy sign when we have  
a government which is big  
enough to change its mind be-  
fore it is too late, and consider  
suggestions from the opposition.

In the second place it looks to  
us like a fortunate circumstance

when we have an opposition  
alert enough to see the flaws  
in proposed legislation and draw  
the attention of the government  
to them in a fair and statesman-  
like manner.

In both cases both parties  
are giving evidence that they  
are trying to play the game.

Business is showing an up-  
turn in more directions than  
one. Wheat and livestock prices  
have climbed to the first  
step above the ruination levels  
of a couple of months ago.

Mercantile sales are showing  
an upward tendency. Auto-  
mobile concerns report a quick-  
ening of sales. A generally  
better feeling pervades the  
fields of finance and commerce.

Like the Great War, the depres-  
sion is bound to end some time.

## TENDERS FOR COAL

SEALED Tenders addressed to  
the undersigned and endorsed  
"Tenders for Coal," will be re-  
ceived until 12 o'clock noon (day  
light saving), Monday, May 22,  
1934, for the supply of coal for  
the Dominion Buildings and Ex-

perimental Farms and Stations  
throughout the Provinces of  
Manitoba, Saskatchewan, Alber-  
ta and British Columbia.

Forms of tender with speci-  
fications and conditions attached  
can be obtained from H. F.  
Dawson, Acting Chief Purchasing  
Agent, Department of Public  
Works, Ottawa; H. E. Mathews,  
District Resident Architect,  
Winnipeg, Man.; C. J. Stephen-  
son, District Resident Architect,  
Regina, Sask.; Chas. Kellogg,  
District Resident Architect,  
Calgary, Alta.; and C. F. Daw-  
son, District Resident Architect,  
Victoria, B. C.

Tenders will not be considered  
unless made on the forms sup-  
plied by the Department and in  
accordance with Departmental  
specifications and conditions.

The right to demand from the  
successful tenderer a deposit,  
not exceeding 10 per cent of the  
amount of the tender, to secure  
the proper fulfillment of the con-  
tract, is reserved.

By order,  
N. DESJARDINS,  
Secretary

Department of Public Works,

## Special Appeal To Women

Australia's Safety Council Hopes To Prevent Accidents In Home

The National Safety Council of Australia makes in letters a special appeal to women everywhere. The latter has reference to the frequency of scalding accidents to children due to the careless handling of utensils containing boiling water and other liquids. A common cause of such accidents is the practice of putting boiling water into the bath and then turning away to obtain towels, or to get cold water to add to the hot water instead of putting in cold water first. A child recently swallowed the safety pin and chain attached to its "comfort" and died. Why a "comfort" at all?

The safety council refers specially to the danger of cleaning napkins gloves with petrol, and a case is cited in which the cleaning of six gloves left to remain burning. But the risk is equally great with any kind of grease, and with any material if it is rubbed when wet with petrol. Women will be very grateful to anyone who gives them a substitute for petrol, and one that requires a large quantity of the cleaning agent. Dry cleaning by an expert is too expensive to be indulged in frequently, and many good materials used for women's good dresses or coats that will neither fade nor shrink when washed, require a good deal of home cleaning is therefore necessary. Then there is the danger of inhaling the fumes, which may have "bad" effects. It is to be noted that all petrol cleaning out of doors. The price of safety is incessant vigilance and care.

## Cannot Finance Himself

High Priest Of Technology Is Completely Driven Out

Howard Scott, high priest of technology, who was going to put the whole country on its feet, cannot get on his own. His estimate is that he cannot pay from \$3,000 to \$4,000 to about a dozen creditors, because of his loss in his warehouse, and his bad clothes. He is not worth as much as millions of others, but he is on the wrong side of the street. "My friends," he says, "have to support me." If he can show us how to do it, we can get him out of here. The late John D. Rockefeller, who called him an "efficiency engineer," who promised to save him \$100,000, by reorganizing his affairs, but he was not able to do so. "You ever made \$100,000 running a plant?" he asked. "Yes," he replied. "Then get 'em out of here," Curran, Detroit-Saturday Night.

## Less Space Required

Cattle Weighing 1,000 Lbs. Or Less Get Reduced Freight Rate

Canadian cattle weighing 1,000 pounds or under get a 10 per cent reduction from the \$12-a-head rate to ships to the United Kingdom. This was explained by G. B. Rothwell, Dominion livestock commissioner. Mr. Rothwell appeared before the senate committee on commerce and trade to report his evidence caused much confusion.

In his statement Mr. Rothwell explained that it is possible under present regulations, to accommodate five cattle of lighter weights in the space required for four cattle of heavier weights.

## New Line Of Research

Theory That Tumor Rises From Cancer Belief Considered

Tax on mutated roads has been put forth by Dr. J. Shelton Hooton of Richmond, Va., as one of the plausible theories for cancer in North America.

"Carcinoma as it sounds, the theory is being given serious consideration by science," said Dr. Hooton, a director of the American Society for the control of cancer, in an interview.

"It has been demonstrated that painting the new road with tar after a long period of time will produce cancer."

"It is barely possible that the tar particles in the air over highways can cause cancer by settling in the skin or by lodging in the mouth, nose or throat."

The Detroit River is sometimes called the Dardanelles of the New World.

"Deck Ducks on Cruises," states a headline. We have been on ships like that, too.

W. N. U. 1900

## Worth Striving For

Principle Of One Dollar Offered For Each Bushel Here

In growing bushels of wheat, it is necessary to always keep in mind the "valued" type and size toward that goal. The select bushel here is the best grade on the market and represents the type of bushel which will produce a carcass suitable for export to the United States. At the present time, the premium of one dollar for "selects" represents a sufficient percentage of the total value of the bushel to make it well worth striving for.

Too select hogs probably it is not only necessary to produce, but to produce hogs as possible, but they must be grown and fattened economically. This necessitates the use of cheap efficient feeds, and in most cases requires that the coarse grains and fattening feeds be grown at home. The feeding of hogs often helps materially in the marketing of low quality grain at a substantial price.

Good feeding practices must be adhered to in order to produce useful type hogs economically. Growing feeds during the early stages of the pig's life and broadening the ration and feed more of the fattening feeds as the hogs approach market weight. Of the grain, oats is the popular growing feed, while barley and wheat are more commonly used in finishing the hogs. In addition to the basic feeds, it is necessary to provide certain supplemental feeds in order to achieve best results. The form of the ration, milk or buttermilk should be a part of the ration. Tankage or fish meal may replace some of the milk by-products are unimportant. Minerals, too, should be supplied daily in order to supply the nutrients needed for growth and skeleton formation.

The Division of Animal Husbandry, Canadian Experimental Farm, Ottawa, recently published a pamphlet, "Rations for Economical Pork Production." This pamphlet contains full details of the ration and feed for swine of various ages and may be procured free of charge.

## Women More Sensible

In Making Will

Men Think It Hastens Death Declared Lady Lawyer

"Women are more sensible in the making of wills than men," said Miss Mildred McCurdy, addressing a group of women at a luncheon at the Hotel Windsor. "When a man has drawn up a will, he thinks he is going to die. Women think at the matter more practically. Two kinds of law were in force in Manitoba, she explained. A person may sign his own will, but the instructions will be carried out. The lawyer is a lawyer's office, with two witnesses. In a more complicated procedure, the wife to sign the will, and the wife, if simple, if you want to write your own will, you must have a lawyer. I leave my property of every kind, I leave my dear little mother-in-law, Sarah Jane." If specifications are added about the children when they reach the age of 21, litigation of long duration follows.

Women in Quebec are less free than in other provinces in the owning of property, Miss McCurdy continued. In Manitoba, property is held under the land title system, with the province assuming the responsibility for the correctness to the title. Joint ownership, she explained, is a system of owning property between man and wife, with the last survivor getting the property. This system precludes the possibility of making a will.

Under the Dower Act, a woman of Manitoba may receive a third of her husband's estate at his death, but this share must not exceed \$100,000. In Saskatchewan a woman can sell her house without her husband's consent, but this is not the case in Manitoba.

## Has Strange Prerogative

The Tchoborne, whose annual dog ceremony takes place in early spring on their Hampshire estates, have a strange prerogative: The best of the family may

be thrown on a horse on the occasion of a King's coronation. James II. granted of this unusual privilege. The dog ceremony consists of the distribution of bags of flour to all tenants working on the Tchoborne estates. Neglect of the ceremony is supposed to entail endless bad luck.

## Has Strange Prerogative

be thrown on a horse on the occasion of a King's coronation. James II. granted of this unusual privilege. The dog ceremony consists of the distribution of bags of flour to all tenants working on the Tchoborne estates. Neglect of the ceremony is supposed to entail endless bad luck.

"You don't like my slaying horses. But you would be pleased if I became a star."

"Yes—the nearest is 12,000,000 miles away."

Man is midway between an atom and the smallest star in size.

## AUSTRALIAN ARTIST PAINTS POPULAR DUCHESSE

The portrait of the Duchess of York, which has just been completed by James Quinn, famous Australian artist, is to be exhibited at the Royal Academy Summer Exhibition. The portrait shows the Duchess in a simple white-collared black frock, with a marvellous cold flung carelessly over the back of her chair. Mr. Quinn is shown standing beside his work.

## Starts On Secret Mission

Master Locksmith To Europe - Chester Courtenay, master locksmith of New York, has gone on his second mission to Europe within a year to aid in a treasure hunt.

Just what the present hunt is, however, was as much of a mystery as the one last June when he sailed on what later proved to be a trip to aid in opening treasure chests about the sunken liner "Egypy".

Neither Courtenay nor anyone else connected with the present trip would talk about it. It was recalled that when he returned from the liner "Egypy" adventure last year, there were reports he would sail again this spring to take part in treasure salvaging operations on the "Lusitania". The Courtenay, which carried Earl Kitchener to Kinsale, Ireland, in May, 1915.

An even more fantastic speculation concerning Courtenay's present trip was that it might have to do with efforts to locate the British cruiser "Hampshire," which carried Earl Kitchener to his death when it was sunk off the West Orkney Islands in June, 1916.

Kitchener was en route to Russia on a secret mission. Nothing made public at the time or after the sinking of the cruiser, however, contained any intimation the warship carried treasure.

## Alberta Hog Marketing

More Than 34 Per Cent Of Marketings For All Canada In 1929

A heavy year in hog marketing was recorded in 1929 in Alberta, which has now come to be recognized as one of Canada's hog provinces. More than 1,000,000 head went to market from the farms, or more than 34 per cent of the total of all Canada's hog marketings for the year. Three years ago Alberta's total hog marketings amounted to only 25,000 per cent of Canada's total. Last year more than 1,000,000 head of live hogs were shipped out of the province, mostly to eastern Canada, while 450,000 head were slaughtered within the province.

Graves have been found in the 23rd district of Germany of 8,000 members of a Celtic tribe which, it is believed, was entirely destroyed by Julius Caesar in 55 B.C.

## Causes Of Mental Trouble

Health Bulletin Says Fifty Per Cent Caused By Environment

An appeal to every intelligent Canadian citizen to inform himself regarding the facts relating to mental health and to prepare to co-operate in an effective plan to combat mental disease is made in a recent number of Mental Health, monthly bulletin of the Mental Hygiene Institute, Montreal. It is pointed out that there were 30,448 patients in Canadian mental hospitals on January 1, 1929, and by December 31 of that year the number had grown to 32,059, an increase of 5.11.

"Apparently 50 per cent of the mental problems receiving attention in special hospitals belong to what is known as the non-organic or functional group," Mental Health says. "In this group there is no demonstrable physical or toxic factor which has intervened to produce the mental life. Simple failures in the relationship between the individual and his environment, have increased and grown in importance with the years until the harmony within the person has been completely destroyed—has lost any possibility of being restored to the mental problems belonging to the organic group." Mental Health says: "The group, given a more widespread understanding of the principles of mental growth and the application of these principles in the lives of developing individuals in the homes and schools."

## Has Three-Fold Advantage

The increasing sale of branded beef in Canada denotes a three-fold advantage. The supply of a higher quality in the food of the people; greater encouragement to Canadian farmers who are devoting their efforts to feed better quality into beef and an expanding co-operation on the part of Canadians in building up one of Canada's most important national industries.

## Oldest Cedar In England

With the gift of Liverpool Cathedral of an old home in Cheshire is included the oldest cedar tree in England. The building is called Chorlton House, and it stands at the end of the parish church. About 300 years ago Edward, Poole's lord, sent from Aleppo and planted it near where the parish house now stands.

## Fish Demonstrations

For Prairie Cities

Program Being Arranged For Cities In Alberta and Saskatchewan

Fish cooperations demonstrations, planned as part of the program of the Dominion Department of Fisheries, are now being arranged for Alberta and Saskatchewan cities, following the conclusion of demonstrations held on the Pacific Coast.

Prior to going to British Columbia, some weeks ago, Mrs. Evelyn Spencer, the department's cooperations specialist, had conducted demonstrations in different parts of Ontario, Quebec, and Manitoba.

The schools for Alberta and Saskatchewan meetings has not been wholly completed but in making the arrangements for the work to be done by Mrs. Spencer in these provinces the Dominion Department will have the co-operation of provincial authorities. It is expected that demonstrations will first be held in several of the larger centers of Alberta and then Mrs. Spencer will begin the Saskatchewan program.

In British Columbia, Mrs. Spencer held demonstrations at Vancouver and Victoria, and in the latter city where she gave several addresses on fish foods and methods of preparing them for the table. She also spoke over the radio on a number of occasions and before several clubs. At her work is designed to increase popular interest in the Canadian fish and game industry and to stimulate the use of Canadian fish and shellfish. The Vancouver and Victoria demonstrations were successful and representative of the Pacific Coast fishing industry expressed themselves as thoroughly convinced of the usefulness of the campaign and as a means of increasing the demand for the fisherman's products. Approval of the campaign was officially recorded in a resolution passed by the Pacific Coast section of the Canadian Fish and Game Association, which is the "fishermen's" sincere and practical endeavour to stimulate greater home consumption of fish and praising the admirable manner in which the work is being done.

## Gardening Notes

By Gordon Lindsay Smith

Rock Gardening forms one of the most fascinating bits of work a person may tackle. The underlying principle is to treat the soil as a series of Alpine plants. An actual slope, or an artificial one, is turned into a miniature section of the Alps or Rocky Mountains. There are peaks, upper gravelly valleys and lower Alpine meadows. It is advisable to use irregular stones arranged in such a way as to get the mountain effect, but also so that they are securely anchored in the soil with the earth between connected up with the core of the slope so that the roots can penetrate to fairly permanent moisture. Where an elaborate garden is planned one should provide himself with special literature as in creating a difficult replica of this kind there is a great danger in overdoing the thing.

Making a Lawn:—The lawn is distinctly a permanent affair. We can add to it or subtract from it, but a very difficult job indeed in remedying an original mistake. It is far easier to level the ground before we sow the seeds of grass than it is to level the plot as much as possible the first thing. After this, allow it to lie for some time, and then sow the seeds to germinate and any settling, rain and frost will help in the last stages of the process.

Selected grass without weed, as early as possible in the spring—grass is a cool weather plant—and sow it in regular grass year after year and improve in density and color. It goes on, we must buy good quality seed as only in the best mixture do the seeds produce a sward of every higher priced and permanent grasses which will come on after the first mow crop grasses have died out. The good mixture of seed should be of from six to a dozen different varieties. After sowing, cover lightly by raking in, and then roll with a roller over the plot with a powder or roller. The regular mowing, which should start with the grass is about two inches high, will destroy any weeds which may have survived the preliminary cultivation, although in the case of lawns it is possible that it may be necessary to dig these out and reseed. An application of commercial fertilizers of phosphorus and potash, which is especially treated, is advisable every spring. Beware of ordinary manure as it is likely to be filled with the seeds of possible weeds.

Very dry weather and roll once or twice when the ground is still in the spring. One must wait a week or two before the early part of the season and not so late in summer.

When To Plant:—The temptation is to plant in the autumn, as the soil is dry enough in the spring, not thinking of the cold, but the autumn is the best time. As written W. T. Macdon, Dominion Horticulturist. The reason is that many seeds rot in the ground without germinating. It is better to plant in the spring after the plants appear above the ground they are killed with frost. Among the plants which may be sown as soon as the soil is dry enough are the Sweet pea, Virginian Honeysuckle, Poppy, both the Shirley and California, Alyssum, Cornflower, Port Marigold, Larkspur, Camellia, Coriander, Candytuft, Colewort and Linaria. Included in the more tender annuals which should not be sown until there is little danger of frost after the plants come up are the Nasturtium, Biscuit, Stone, Marigold, Aster and the ordinary Stocks. There is also the temptation to set out plants in the autumn, but similar bedding plants outside too early, especially potted plants which have been made in the winter. In the case of Canada there are plants that should not be planted outside until nearly the end of May. Canada and Dahlias are the plants which are planted outside, although Gladiolus can be set out as soon as the soil is dry enough.

## A Famous Gold Mining Area

The Kirkland Lake gold area in Northern Ontario, is famed throughout the world because of the richness of its ores, the annual value of its gold output, the extent of its dividend disbursements, and lastly because of the remarkable success that has attended development work at the several properties in the area, according to the Department of Mines, Ottawa.

London taxi drivers are opposing the proposal of the British Home Secretary to increase fares.

Roumanian's plan to develop a radio broadcasting system is making progress.

### Interesting Local Items

Mr. Jack Hope has been ap-  
pointed steward at the local  
Legion club.

The recent rains have left  
the streets in town in bad shape.  
But never mind it was good for  
the gardens and prairies.

Henry VanWert has had a  
fine new awning placed over  
his front show window. This  
will add to the comfort of his  
customers during the summer.

A. McGimpsey is making  
good progress with the erection  
of his new building on Broad-  
way, despite the unfavorable  
weather. He expects to have it  
ready to occupy in a few weeks.

The moisture of last week's  
end was very welcome even if  
it did delay seeding operations  
for a few days. The price is  
showing a big improvement al-  
ready as the rains have given a  
good start to pasture lands.  
Conditions at present are most  
favorable.

The Masquers Club, of Win-  
nipeg, won the Dominion Drama  
festival competition held in  
Ottawa last week. Their play  
was "The Man Born to be  
Hanged" by Richard Hughes.

Enr, was the second best pre-  
sentation.

Mr. Gas Seville, of Medicine  
Hat, is spending a few days in  
town the guest of Mr. Bruce  
Woodcock.

Fred Walker, Jr., returned  
home Wednesday from Medicine  
Hat hospital where he had been  
confined for some time.

Everton won the classic of  
English soccer, the English cup  
final, last Saturday by defeating  
Manchester City 3-0 in the 4th  
all-Lancashire final of the his-  
toric series. It was Everton's  
second victory in the final.

The chairman and board of di-  
rectors of the Medicine Hat Gen-  
eral Hospital, the superintendent  
and the officers of the  
training school, announce the  
annual graduation exercises of  
the 1933 class, which will take  
place at Fifth Avenue United  
Church at 8:30 p.m., Friday,  
May 12th. To these exercises  
all interested are cordially in-  
vited.

### GOOD INVESTMENT IN USED CARS

**WANT TO SAVE?  
HERE'S YOUR CHANCE**  
Are you all full of ambi-  
tion to save money—to  
economize "till it hurts?"  
Well here's a place where  
you can save and it won't  
hurt a bit. You'll really  
feel better afterwards for  
having bought so much car  
for so little money.

**Everybody  
Likes  
billiards**  
A Gentleman's Game  
HUNDREDS of these  
sands play this  
game every day in  
Canada. Why? Be-  
cause Billiards has a  
thrill that can't be  
duplicated in any other  
game. You'll like bil-  
liards played with the  
modern Brunswick  
equipment in our Re-  
creation Rooms.
